

Nikitas Dimopoulos (S'77-M'80-SM'96) received the B.Sc. degree in Physics from the University of Athens and the M.Sc. and Ph.D. degrees in Electrical Engineering from the University of Maryland, College Park in 1975, 1976 and 1980 respectively.

He joined the Department of Electrical and Computer Engineering, University of Victoria (UVic) in 1988 where he is currently Professor and Lansdowne Chair in Computer Engineering. He served as the Chair of the Department (1998-2003 and 2005-2008) and was Visiting Professor at the Computer Engineering Laboratory, Delft University of Technology (2001). Previous to his appointment at UVic, he was Assistant and then Associate Professor at the Department of Electrical Engineering, Concordia University (1980-1987) and member of the Technical Staff at the Jet Propulsion Laboratory, Pasadena, CA (1986-1987).

He was an Associate Editor of the Journal of Circuits Systems and Computers, was a member of the BC Science Council's Computers and Computing committee (1990-1995), the Canadian Foundation for Innovation Multidisciplinary Adjudication Committees (2004, 2006), Expert Panel for the National Centers of Excellence in Commercialization and Research (2008) and external review panels for several ECE Departments in Canada.

His fields of interest are in parallel computers, computer architecture, the Grid, power aware computing and neural networks. His research has been funded by NSERC, the Canadian Cable Labs Fund, ASI, CFI, IBM and CMC. He has published over 155 works in refereed journals and conferences.

Professor Dimopoulos is a Senior Member of the IEEE, Fellow of the Engineering Institute of Canada and Registered Professional Engineer in the Province of BC.
