Course Description

Learning Outcomes
1. Apply multidimensional Fourier and z Transforms to analyse video signals
2. Interpret the multidimensional sampling theorem using lattices
3. Interpret video sampling and sampling rate conversion
4. Illustrate the video standards conversion
5. Use Motion Estimation and Motion Compensation for video frame prediction
6. Demonstrate the foundations of hybrid video coding
7. Illustrate the principles of video coding standards
The final grade obtained from the above marking scheme will be based on the following percentage-to-grade point conversion:
